WINE LIBRARY +

A shiny point catching everybody's attention

The Wine Library model is designed to create the most attractive wine bottle display in any room. The height of the doors, combined with outstanding LED lighting and mirrored internal walls, provide an elegant and refined frame for wine bottles. With the Wine Library, bottled wine becomes a beautiful focal point in the room, capturing everyone's attention.

The Wine Library can be equipped with a humidity control system. Customers can also combine multiple units to create separating walls in large rooms, while also ensuring visual continuity of the room with the front/rear doors of the product. It is also possible to install the Wine Library on a wall, by simply allowing sufficient ventilation. This one-door version features a mirrored, closed back wall, forming a storage wall for wine and other products. The Wine Library's door is made of 1" 3/32 in thick, low emission, double-glazing glass, which is embedded in a frame with magnetic gaskets. The body of the unit is made of a 2 in thick insulating panel.

The arrangement of bottles in the compartment is entirely adjustable, with steel tubes to display bottles horizontally, steel perforated shelves for vertical displays and elegant plexi-glas moulded supports to hold bottles in a horizontal position.

All customers can find a solution that best suits their needs with the variety of size options available in the Wine Library. There are two or three door models as well as height options from 2600mm (102.5in) or 2200mm (86.5in).

WINE LIBRARY +

ECO FRIENDLY

Energy efficient

With LED lighting, 2 inches thick insulation, a 3/4 inch thick low emissions, double-glazing glass door and a control system which improves the efficiency of the refrigeration equipment, energy consumption is quite low in this unit.

Elegant design

Sleek, clean lines, transparent bottle racks, mirrored internal walls, stainless steel handles, and modern, laminated wood create an elegant and refined frame to showcase wine bottles.

Temperature

The temperature settings in this unit range from 39°F to 68°F, which can be set easily by the operator for each module.

Display

Internal layout

Bottles can be displayed in a variety of positions, according to individual needs and tastes: vertically, with stainless steel shelves (R), on an incline, with stainless steel tubes (A) or horizontally, with both plexiglass supports (C) or stainless steel tubes (T).

Internal system

The innovative, ventilated refrigeration system in the Wine Library maintains the correct temperature by means of a hidden evaporator and consequently gaining interior space.

Visibility

The Wine Library's wide display area features LED lights along the perimeter of the door as well as mirrored internal walls, creating a striking effect for the ultimate bottle display with a 360° view effect.

Modular size options

Two height options and two or three door models are available. Each unit is equipped with a stand-alone temperature control kit for the refrigerated compartment. Front/rear doors or a closed back are also options, along with internal mirrored laminate.

Dimmable LED lighting

Being able to adjust your light source means you're able to create the perfect atmosphere in your room, anytime.

Colour options

The wood laminate body is available in both semi-glossy black and brushed aluminium grey. The unit's door frames are made of anodized aluminium in silver or black.

Brushed Aluminium Grey

Semi-Glossy Black

OPTIONAL - Unfinished*
